

Turn ordinary concrete into.....Decorative Concrete!

**Harris has a full line of Concrete Stamps and Decorative Concrete Colors and Dyes-
For Rent or Purchase!**

Make your concrete look like this:

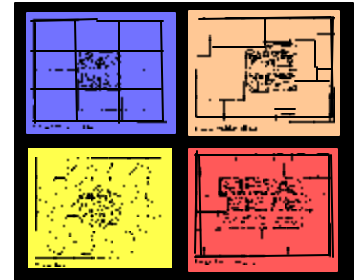

Introducing from **A.H. Harris:**

 **SYMONS** Decorative Concrete

Designcrete™ Concrete Stamping System

A.H. Harris has a **full line of Concrete Stamps for rent or for purchase.** Contact your local A.H. Harris for more information!

The Designcrete™ concrete stamping system changes ordinary concrete surfaces into exceptional architectural designs. Designcrete™ can be applied to almost any newly placed horizontal concrete surface including patios, sidewalks, driveways, entrances, lobbies, and more. Uses color hardener, powder release, stamping tools and acrylic sealer to create a textured surface on concrete slabs.

Sprayrite™ System

The Sprayrite™ system is a specially formulated material for resurfacing existing concrete surfaces. Sprayrite™ can transform plain, damaged, or stained concrete surfaces into attractive textured surfaces. A variety of colors and pattern templates are available. Can be used vertically or horizontally.

Patina Stains

Patina stains are penetrating liquid stains that produce unique color effects in finished concrete surfaces.
